INVENTORS & INVENTIONS

WHO, ME? AN INVENTOR?

Yes! People from every corner of the world, of different ages, with different levels of education invent by identifying problems, pursuing ideas, and developing new solutions. The key to inventing is identifying a need and creating an original solution.

WHAT'S AN INVENTION?

An invention is a useful creation that didn't exist before.

- An invention usually fills a need or solves a problem.
- Inventions often make the world a better place.
- Inventions can be things (e.g., a cell phone or backpack) as well as ideas (e.g., a new method for tying a knot, or a story).
- An invention often makes something better (e.g., faster, stronger, cheaper, easier, safer or more efficient, attractive, useful, accurate, fun, or productive). But as long as it's a new way to do something, it's still invention even if it isn't necessarily better than what existed before.
